Fiscal Studies

Index to Volumes 11–20

This index is in three parts — an author index, a JEL index according to the classification used by the *Journal of Economic Literature* (for volumes 18–20 only) and a title index. Full details of all articles can be found in the title index, including the names of all authors. Volume numbers are given in **bold**, issue numbers in *italics* and page numbers in roman. A list of the JEL classifications used can be found on page 1.

Articles in *Fiscal Studies* customarily begin on an unnumbered page. The assumed page numbers have been used in these indexes; they are not enclosed in square brackets.
